

taridium

conferencing solution

Taridium's VoIP conferencing solution allows you to host your own conferences, with your own dedicated dial-in numbers.

key advantages

- dedicated and secure rooms
- on-premise call recording
- no additional per minute costs
- dedicated dial-in numbers
- 24x7 monitoring network

With taridium's conferencing solution you run your own conference rooms under your full control.

With additional call recording, you record and control all sensitive information. Data is stored in a relational database for easy look-up and CTI integration.

There are no additional per minute costs, except for any PSTN charges. Taridium's conferencing solution also supports direct SIP dial-in which reduces costs even further.

Taridium's conferencing solution can be setup with local dial in numbers in over 30 countries worldwide. These are your own dedicated numbers and can be used for other purposes as well.

All of taridium's solutions are continuously monitored and allow us to react quickly to any potential issues.
