

taridium

managed voip services

The Taridium managed VoIP offering is a complete PBX replacement solution for small to medium enterprises. From 15 to 300 users, Taridium Managed VoIP combines the reliability of an on-premise open standards VoIP telephony system, with the convenience of a simple monthly fee for equipment, services and support.

key advantages

- Fully Featured & Customizable VoIP PBX
- Low Setup Costs and lower TCO
- 7x24h Monitoring with Multi-Level Escalation Options
- Around the Clock Service by Highly Trained Specialists
- Provider and Location Independence
- Next Day Equipment Replacement

what you get

A complete, configured and managed phone system that includes hardware, software and phones. Taridium will take care of next-day phone replacement, feature upgrades, adds, moves and changes as you request.

how it works

Taridium carefully determines your needs and provides you with a custom managed services contract. You have the choice of a wide variety of telephones and termination/origination providers - regardless whether you need a traditional PRI or a VoIP only solution. You choose whether you want to have your system on-site, or in a colocation facility. Taridium will be your single contact for all your telephony needs.
