

FOR IMMEDIATE RELEASE

Taridium Announces comms™ Startup Edition

New York, NY, Feb. 4, 2008 – Taridium LLC (<http://www.taridium.com>) a next-generation VoIP solutions provider for both enterprises and service providers announced today the introduction of the comms™ startup edition for service providers.

Taridium's comms™ startup edition is a single server package that provides between 200 and 500 concurrent phone calls and up to 5000 extensions.

The comms™ startup edition is ideally suited for small telecommunications providers, real estate developments and multi-tenant applications. “The low entry price is perfect for the budget conscious startup company or real estate developer wishing to provide telephony services to their businesses or homes” said Matthew Kovatch, CSO of Taridium. Operators enjoy all of the standard features of the complete comms™ provider platform as well as Taridium's integrated billing solution. Taridium's billing solution is tightly integrated with the comms™ provider platform and provides all the features necessary to invoice your customers out of the box.

Virtual PBX

The package includes the virtual PBX application which allows operators to have as many as 50 business class PBX's running on a single server. With the comms™ virtual PBX interface business users have access to a fully featured hosted PBX, including call forwarding, DID management, voice mail to e-mail and IVRs. Paired with sophisticated one-click phone provisioning, operators can easily deploy hundreds of phones on or off-site.

Taridium's comms™ startup edition includes the software license, 6 months of product maintenance, 7x24 monitoring and complete installation at one low price.
